TRUSTAM DATA - DATA CARD

Phone repair, first-person

Summary

Close, fine-motor work: screen replacement, soldering and diagnostics at phone repair stalls.

Head-mounted video of phone technicians opening devices, replacing screens and batteries, soldering and testing. Strong on precise hand-object interaction at close range.

At a glance

Modality: video, sensor Source: task capture

Hours available now: 0 Collectable on request: 150 Status: collect to order

Trades: phone repair

Labels: raw, curated Label layers: curated, hand pose

Formats: MP4 H.264 1080p30, JSON metadata per clip, IMU + GPS sidecar (CSV), LeRobot / RLDS on request

Price: on request (sales@trustamai.com).

How it is collected

Recorded in Nigeria by paid, ID-checked adults (BVN or NIN) on the TrustAm Recorder app: 1080p H.264, with motion (IMU) and coarse GPS sidecars.

Every recording passes automatic checks on every minute (file, black/frozen, duplicates, hands, sensors); people review sampled and flagged minutes and grade them A / B.

Recorders are paid per approved minute; nobody pays to join.

Consent and privacy

Each recorder agrees on video to licensing for AI training, in English or Pidgin; the consent version is in every delivery manifest.

Bystanders' faces and number plates are blurred before delivery; children are never the subject; ID numbers and private screens are removed.

A recorder can withdraw: future licensing stops and buyers are asked to delete their copies (licence clause). Locations are coarse (about 1 km) unless a workplace agreed.

Metadata fields per clip

clip_id (string) - Stable clip ID

duration_s (number) - Clip length in seconds

trade (string) - Trade slug

workplace_id (string) - Pseudonymous workplace ID

contributor_id (string) - Pseudonymous contributor ID

consent_id (string) - Consent record ID

consent_version (string) - Consent text version

capture_date (date) - Capture date (WAT)

device_model (string) - Phone model

qa_score (number) - 0-1 review score

Licence

Non-exclusive licence for AI training. Every contributor is ID-checked and consented on video in their own language; bystander faces are blurred; every minute is reviewed by a person. Full licence: /data/legal/licence (draft until our lawyer delivers the final text).
